Comments:

Zoom sessions are live-only and will not be recorded. Attending classes in week 2 on campus is highly recommended!

Make sure you have *read the online material for each lecture in advance!* We are going to discuss solutions for the practice problems in class. Also *solve the problem sets before class.*

This is going to improve your understanding substantially!

The free afternoons are intended for reading the script /online chapters. Use them, especially if you do not have a strong mathematical background.

Instead of office hours, individual meetings can be arranged upon demand. Feel free to send me an email: [julian.klix\[at\]uni-mannheim.de](mailto:julian.klix[at]uni-mannheim.de)

For questions that are not directly related to the math course, please contact Sebastian Herdtweck via email to: [econgrad\[at\]uni-mannheim.de](mailto:econgrad[at]uni-mannheim.de)
